Improve these sentences by creating an expanded noun phrase for each one.

They looked up at the _____ buildings.

Dominika and Kamil had a great time riding the _____ horses.

Which year 2 common exception word has Mr Whoops been juggling with?

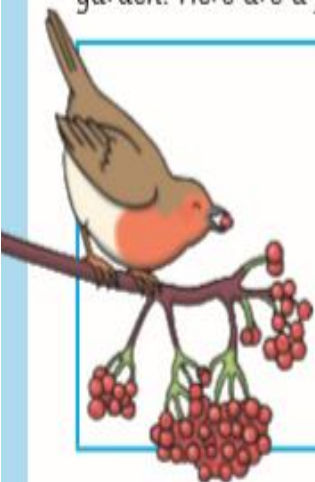

Birds in Your Garden

There are many different types of bird that you might see in your garden. Here are a few of them:

Robin

Robins are very easy to spot in your garden. They have a red breast and a brown head and back. They have long legs and a short tail. They live in one area to stop other robins living there. They eat insects, fruit, seeds and worms.

Jackdaw

The jackdaw is a noisy bird. They are quite large and have a grey neck, a short beak and white eyes. They eat insects, dead animals and other birds' eggs. They live in woods, parks and gardens. Jackdaws steal things; not just food but objects too!

Blue tit

The blue tit is a very small bird with bright yellow and blue feathers. They eat insects, seeds and nuts. They eat from bird tables and live in garden nesting boxes.

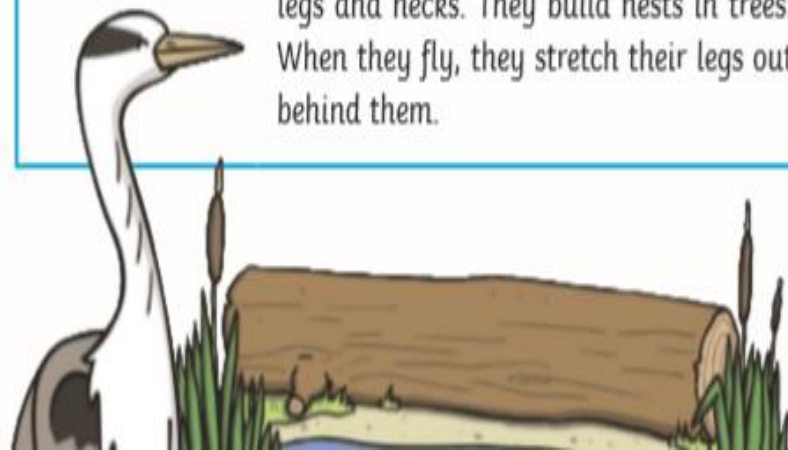

Blackbird

Blackbirds are very common garden birds but they also live in farmland and woodland. Blackbirds live on their own. The male is black with an orange beak, and he has an orange ring around his eye. The female is dark brown with a brown beak. They nest in trees and like to sing.

Heron

Hérons live near ponds. This is because they eat fish and sometimes steal the fish from people's ponds! They are quite large with a long thin beak. They also have thin legs and necks. They build nests in trees. When they fly, they stretch their legs out behind them.

Task 4

Answer the questions below in full sentences.

1. What colour is a robin's breast?
2. Where do blue tits live?
3. Name two things that are true about jackdaws.
4. Why do herons live near ponds?
5. What does a female blackbird look like?

Maths

How Active Are You?

Being active is very important to everyone. Anything that makes you move your body, keeps you active.

Exercise is moving and being active. You might feel tired or a little warm after exercising.

You need energy to be active and exercise.

How active have you been today? How active have you been this week?

Exercise Is Good for Me

Exercise is extremely important for you because it keeps your body healthy.

Another important reason exercise is important is because it makes you feel great! The more active you are, the more energy you will have. This energy will make you feel fantastic!

What Exercise Can I Do?

Children are very active. It is very likely you will have done a lot of exercise and not even noticed it.

It is important to remember you can still do less active activities, like reading a book, but it's important to balance these with plenty of activity.

Can you think of five ways of exercising you might do over this week?

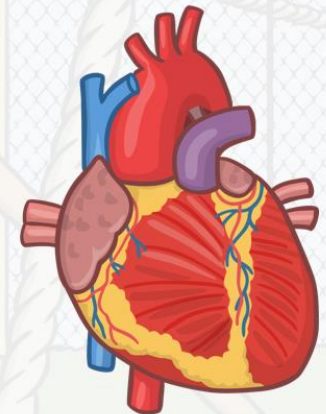

Why is Exercise Important?

Exercise makes your heart happy!

You may know that your heart is a muscle. It works hard, pumping blood every day of your life. You can help this important muscle get stronger.

Exercise can get your heart pumping, make you sweaty, and quicken your breathing.

When you give your heart this kind of workout on a regular basis, your heart will get even better at its main job – delivering oxygen to all parts of your body.

Why is Exercise Important?

Exercise strengthens muscles.

Exercises that make your muscles work hard, help to make your muscles stronger.

This type of exercise builds strength.

By using your muscles to do powerful things, you can make them stronger.

Why is Exercise Important?

Exercise makes you flexible.

Exercises that stretch your muscles, help your body become more flexible.

Being flexible is having "full range of motion", which means you can move your arms and legs freely without feeling tightness or pain.

Why is Exercise Important?

Exercise keeps the balance.

All food, and some drinks, contain calories. Your body needs a certain amount of calories every day, just to keep going.

If you are active, your body uses up more calories. If you are not active, your body won't need as many calories.

Whatever your calorie need is, if you eat enough to meet that need, your body weight will stay about the same. If you eat more calories than your body needs, it may be stored as excess fat.

Task 1

Time yourself doing your 5 exercises. How many times can you do each of them in a minute?

Name of exercise	What do you do?	How many times can you do it in a minute?	What happens to your body?

Which exercise could you do the most times in one minute?

Which exercise did you like the best?

Which exercise did you feel was the hardest?

How does exercise make your body feel?

Complete these sentences using the words in the word bank.

Humans need exercise because it keeps their heart _____.

Exercise makes your muscles _____. It uses up calories and keeps your body _____.

When you do exercise, your body feels _____. Your heart beats _____ and you breathe more _____.

Word Bank:

fit

faster

quickly

stronger

tired

healthy

Task 2

Create a learning poster
teaching your family about why
exercise is important
